# Assembly Guide

Doktar

👋 If you have more questions regarding the assembly, disassembly or SIM replacement of the FieldStation, please feel free to contact us at support@doktar.com

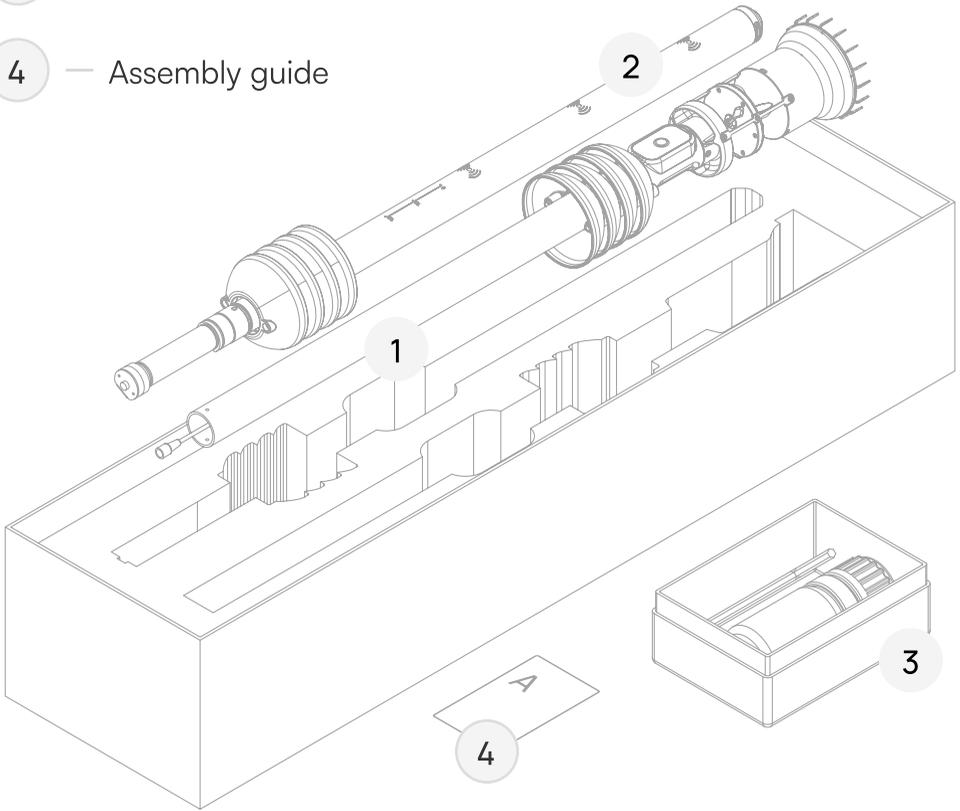

Doktar App allows you to track Doktar's IoT devices from a single application.

# Parts

Depending on the model you have, the sensor body parts may vary. The essential components are illustrated in the diagram below:

1 — Top module

2 — Bottom module

3 — Accessory box

4 — Assembly guide

# Assembly

The steps can be applied both for Standard and Pro.

# Step 1

Carefully take the device out of its box

# Step 2

Align top and bottom module as shown in the diagram

(i) Make sure the control button and sensor marks are facing the same direction

# Step 3

Install cable hanging inside the tube to the connector on top of the bottom module

ⓘ Apply liquid silicon oil on shown areas of the gasket using the bottle provided with the box
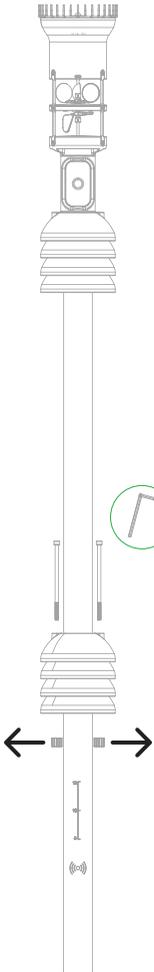

# Step 4

Push modules firmly until they fit together

Control button and
sensor markings should
be aligned

# Step 5

Fasten the screws using the key provided until it stops moving. There are only two screws to be fastened.
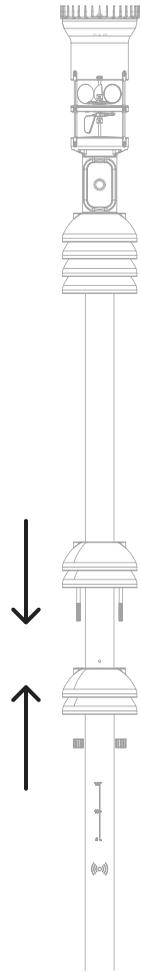

⚠ Make sure to not overtighten the screws.

2x

Split shades group in two parts to expose screw holes underneath
